CONTENTS TO VOLUME 25

PART 1 FEBRUARY 1981

Nonlinear cylindrical or spherical converging ion-acoustic pulses. E. OKUTSU *page* 1

Nonlinear evolution of the sheet pinch. W. H. MATTHAEUS and D. MONTGOMERY 11

Plasma dynamics near a self-similar turbulent state. R. BALESCU 43

Surface wave instability in bounded magnetized plasma with inhomogeneous particle stream. D. JOVANOVIĆ and S. VUKOVIĆ 63

Parametric instabilities with well-separated frequencies in magnetized plasmas. Y. M. CHOU and S. T. TSAI 73

Stability of weakly nonlinear ion sound waves with finite ion temperature. E. INFELD and G. ROWLANDS 81

Magnetic field reconnexion in a sheared field. M. UGAI 89

On the kinetic instabilities of uniform magnetized plasmas with generalized loss-cone distribution functions. L. GOMBEROFF and S. CUPERMAN 99

Effect of thermal anisotropy on the loss-cone produced high-frequency quasi-electrostatic ion-cyclotron waves in mixed warm–cold plasmas. L. GOMBEROFF and S. CUPERMAN 103

Hall current effects on tearing modes in rotating reverse field plasmas. J. KAPPRAFF, W. GROSSMANN and M. KRESS 111

Low-frequency heating of doublets. T. H. JENSEN, F. W. MCCLAIN and H. GRAD 133

Three electrostatic drift instabilities. S. P. GARY and B. ABRAHAM-SHRAUNER 145

An approach to rapid plasma shape diagnostics in tokamaks. D. K. LEE and Y.-K. M. PENG 161

The plasma capacitor problem. J. N. ELGIN 175

PART 2 APRIL 1981

Ponderomotive pressure effects in laser driven high-temperature plasma flows. J. L. BOBIN 193

The electrostatic instability of rippled, magnetically focused, non-neutral, cylindrical beams of charged particles. S. CUPERMAN and F. PETRAN 215

Debye shielding of a moving test charge in plasma. C.-L. Wang, G. Joyce and D. R. Nicholson *page* 225

On the 'non-stationary' ponderomotive force of a HF field in a plasma. D. D. Tskhakaya 233

Electrostatic waves potential at the plasma and upper-hybrid resonances. J. Thiel and R. Debrie 239

Excitation of an ion-acoustic wave by two whistlers in a collisionless magnetoplasma. M. S. Sodha, T. Singh, D. P. Singh and R. P. Sharma 255

Low-frequency heating and induced particle transport in an inhomogeneous plasma with Ohmic current. D. W. Faulconer 267

Dispersion and energy conservation relations of surface waves in semi-infinite plasma. V. Atanassov 285

Rapid collapse of antiparallel magnetic field system of finite width by fast reconnexion. M. Ugai 309

Active and passive methods for the study of non-equilibrium plasmas using electrostatic waves. R. Pottelette and L. R. O. Storey 323

Part 3 June 1981

The plasma wake of mesosonic conducting bodies. Part 1. An experimental parametric study of ion focusing by the plasma sheath. N. H. Stone 351

On the temporal development of a plasma sheath, J. W. Cipolla, Jr. and M. B. Silevitch 373

Statistical acceleration of electrons by lower-hybrid turbulence. C. S. Wu, J. D. Gaffey, Jr. and B. Liberman 391

Nonlinear interaction of a Gaussian electromagnetic beam with an electrostatic lower-hybrid wave: Brillouin scattering. M. S. Sodha, T. Singh and R. P. Sharma 403

Thermodynamics of the magnetic equilibria of a semi-collisionless plasma. E. Minardi 413

Nonlinear excitation of magneto-acoustic oscillations by means of an oscillating axial current. I. R. Jones and M. L. Sawley 443

Ion-acoustic wave induced convective cells. P. K. Shukla and M. Y. Yu 451

The bumpy Z-pinch. T. H. Jensen and M. S. Chu 459

Relativistic effects on strong Langmuir turbulence. H. P. Freund, C. S. Liu and R. M. Kulsrud 465

Kinetic analysis of electromagnetic wave backscattering in a magnetized plasma. J. E. Willett and S. Bilikmen 479

The interaction of a moving neutral gas with a stationary magnetized plasma. J. F. McKenzie and R. K. Varma 491

Coupled nonlinear Schrödinger equations for Langmuir and electromagnetic waves and extension of their modulational instability domain. M. R. Gupta, B. K. Som and B. Dasgupta 499

Nonlinear excitation of vortices at the upper-hybrid layer. H. U. Rahman, M. Y. Yu and P. K. Shukla 509

Theory of finite-amplitude electron and ion holes. S. Bujarbarua and and H. Schamel 515

Author Index to Volume 25 531

CONTENTS TO VOLUME 26

PART 1 AUGUST 1981

Studies of strong laboratory double layers and comparison with computer simulation. K. D. BAKER, N. SINGH, L. P. BLOCK, R. KIST, W. KAMPA and H. THIEMANN *page* 1

The theory of ionizing shock waves in a magnetic field. Part 1. Skew and oblique shock waves, boundary conditions and ionization stability. M. A. LIBERMAN and A. L. VELIKOVICH 29

The theory of ionizing shock waves in a magnetic field. Part 2. Transverse, normal and switch-off shock waves and the piston problem. M. A. LIBERMAN and A. L. VELIKOVICH 55

The effect of electron temperature anisotropy on the propagation of whistler waves. T. NAMIKAWA, H. HAMABATA and K. TANABE 83

Propagation of hydromagnetic waves through a collisionless, heat-conducting plasma. T. NAMIKAWA and H. HAMABATA 95

Spontaneous excitation of magnetic fields and collapse dynamics in a Langmuir plasma. M. KONO, M. M. ŠKORIĆ and D. TER HAAR 123

Influence of relaxation processes on the structure of a thermal boundary layer in partially ionized argon. M. E. H. VAN DONGEN, R. B. VAN P. VAN ECK, H. J. L. HAGEBEUK, A. HIRSCHBERG, A. C. B. HUTTEN-MANSFELD, H. J. JAGER and J. F. H. WILLEMS 147

Eigenmode analysis of resistive MHD stability by matrix shooting. J. P. FREIDBERG and D. W. HEWETT 177

PART 2 OCTOBER 1981

Electrostatic instabilities and anomalous transport excited by an energetic ion beam. E. H. DA JORNADA, J. D. GAFFEY and M. Z. CAPONI 193

Nonlinear interaction of electrostatic surface waves in a semi-infinite plasma. Part 1. Derivation of the coupled mode equations. V. ATANASSOV, E. MATEEV and I. ZHELYAZKOV 217

Nonlinear interaction of electrostatic surface waves in a semi-infinite plasma. Part 2. Time-dependence solutions to the coupled mode equations. V. ATANASSOV, E. MATEEV and I. ZHELYAZKOV 231

The parametric excitation of kinetic Alfvén waves by a magnetic pump. N. F. CRAMER and I. J. DONNELLY 253

A generalized treatment of the electrostatic instability of rippled non-neutral magnetically focused electron beams. S. Cuperman and F. Petran *page* 267

Effects of toroidal field ripple on supra-thermal ions in tokamak plasmas. R. J. Goldston and H. H. Towner 283

Langmuir solitons in a two-temperature plasma. B. Buti and M. Y. Yu 309

Marginal stability and critical thickness of strong double layers. C. Wahlberg 317

Reciprocity relations between currents and fields in plane-stratified magnetoplasmas. A. Schatzberg and C. Altmann 333

Resistive instability of interchange mode due to anomalous diffusion. V. P. Pavlenko and J. Weiland 345

Feedback stabilization of tokamaks against slow axisymmetric MHD instabilities. T. H. Jensen 351

Production of plasma vortices by lower-hybrid waves. M. Y. Yu, P. K. Shukla and H. U. Rahman 359

Stability of parallel flow of a multi-component cylindrical plasma to electrostatic perturbations. R. J. Lucas 369

Part 3 December 1981

The plasma wake of mesosonic bodies. Part 2. An experimental parametric study of the mid-wake ion density peak. N. H. Stone 385

Nonlinear electrostatic waves: oblique propagation. R. W. Jackson 399

Three-wave coupling coefficients for non-uniform plasmas. T. Lindgren, J. Larsson and L. Stenflo 407

Nonlinear theta-pinch equilibria. B. Abraham-Shrauner 419

Stability of Doublet III plasmas against axisymmetric resistive MHD modes. F. W. McClain and T. H. Jensen 431

Steady-state solutions for the penetration of a rotating magnetic field into a plasma column. I. R. Jones and W. N. Hugrass 441

A numerical study of the generation of an azimuthal current in a plasma cylinder using a transverse rotating magnetic field. W. N. Hugrass and R. C. Grimm

An experimental investigation of current production by means of rotating magnetic fields. W. N. Hugrass, I. R. Jones and M. G. R. Phillips 465

Magnetic diffusion and current profiles during current reversal. I. P. Shkarofsky and M. Shoucri *page* 481

Parametric instability of hydromagnetic waves with oblique propagation. K. Yumoto 497

Resonant generation of electromagnetic surface wave by inhomogeneous relativistic electron stream. V. M. Čadež, S. Vuković, V. V. Frolov and A. Yu. Kyrie 509

A quasi-moment description of the evolution of an electron gas towards a state dominated by a reduced transport equation. A. H. Øien 517

Equilibrium and stability of collisionless systems in the paraxial limit. W. A. Newcomb 529

Review

Plasma Physics and Nuclear Fusion Research, edited by R. D. Gill 585
